

# Lascaux Studio<sup>©</sup>Original

The inspirational colour spectrum

## New and fresh

### New colours

The four new colours in our Studio Original range of acrylic paints – now more versatile than ever – are Prussian Blue, Transparent Black, Shell White and Crystal White.

- **Prussian Blue:** by great demand we now offer this traditional deep blue in Lascaux's usual high quality. Adding Transparent White to lighten it makes this colour really glow.
- Adding **Transparent Black** to other colours creates darkened nuances.
- **Shell White** offers excellent opacity. Creating a warmer effect than Titanium White, it is significantly lighter than Old White – a homage to the classic Lead White.
- **Crystal White** also offers excellent opacity and produces a whiter effect than Titanium White.

949 Prussian blue

975 Transparent black

987 Shell white

988 Crystal white

912 Lemon yellow

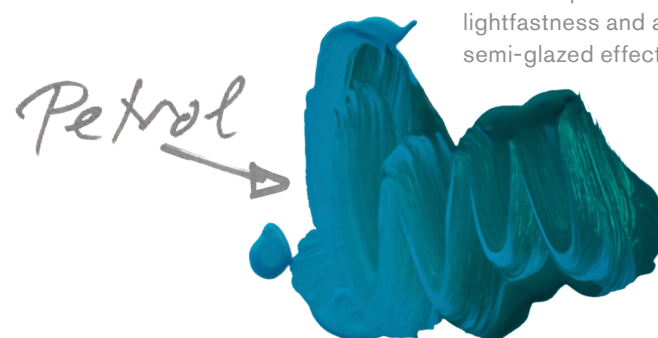

923 Bright red

925 Carmine red

### Modified colours

- **Lemon Yellow** now offers an opaque colour with highly optimised lightfastness. Featuring a purer and more luminous effect, the colour produces superb results when blended.
- **Bright Red** contains a new high-quality pigment for optimised lightfastness and unique brilliance.
- **Carmine Red** with its new pigment features optimised lightfastness and a semi-glazed effect.

The adding of white to a colour is a good test of the latter's quality. High-quality colours will continue to offer a pure and vibrant effect even after white has been added. Our Studio Original Transparent White produces particularly bright, vibrant results. For more muted pastel hues, we suggest the adding of Titanium White.

Shadow colours are so much easier to create with our new Transparent Black – now even beginners can achieve a subtle, gradated darkening of bright colours. If required, the adding of Carbon Black, the deepest black in the Studio range, produces a darker effect.

# As light as fragrance

The Lascaux Studio Original range includes seven balanced pastel colours. The adding of Crystal White or Shell White helps extend the white spectrum range for a wealth of other highly nuanced blends of delicate, gossamer-fine hues.

# Luminously dark

The characterful, dark colours in the Studio range of acrylic colours retain their colouring strength and produce pure, subtle hues even when mixed – that's artist quality for you.

# Mixing with a smile

Whatever the desired result, Lascaux Studio Original leaves nothing to be desired when it comes to mixing. There is no end to what can be achieved – here are a few suggestions for vibrant mixed colours. Go ahead and experiment – you'll be amazed at what you can create!
